Terminal History
Terminal 1 was opened in 1968 and was formally
opened by Queen Elizabeth II in April 1969. At the time
Terminal 1 was the biggest short-haul terminal of its
kind in Western Europe.

A new pier (the so-called Europier) was added in the
1990’s which increased the capacity of the terminal,
catering for widebody aircraft. In 2005, a substantial
redesign and redevelopment of Terminal 1 was
completed, which saw the opening of the new Eastern
Extension, doubling the departure lounge in size and
creating additional seating and retail space.

As part of this unique offering ‘Turn key’ solutions
are available for the extraction, refurbishment and
re-installation globally of the airport systems.
